

Carbon Reduction Plan

Supplier name: Earth-i Limited

Publication date: 22 Feb 2022

Commitment to achieving Net Zero

Earth-i Limited is committed to achieving Net Zero emissions by 2030.

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: 2019	
Additional Details relating to the Baseline Emissions calculations.	
2019 will be Earth-i's Baseline Emissions year. We have been working towards Net Zero by 2030. COVID-19 in 2020 and 2021 has supported our ability to make significant early reductions to meet our target. Earth-i does not have any Scope 3 emissions owing to our product being digital data.	
Baseline year emissions: 2019	
EMISSIONS	TOTAL (tCO₂e)
Scope 1	27,315
Scope 2	74,880
Scope 3 (Included Sources)	N/A
Total Emissions	102,195

Current Emissions Reporting

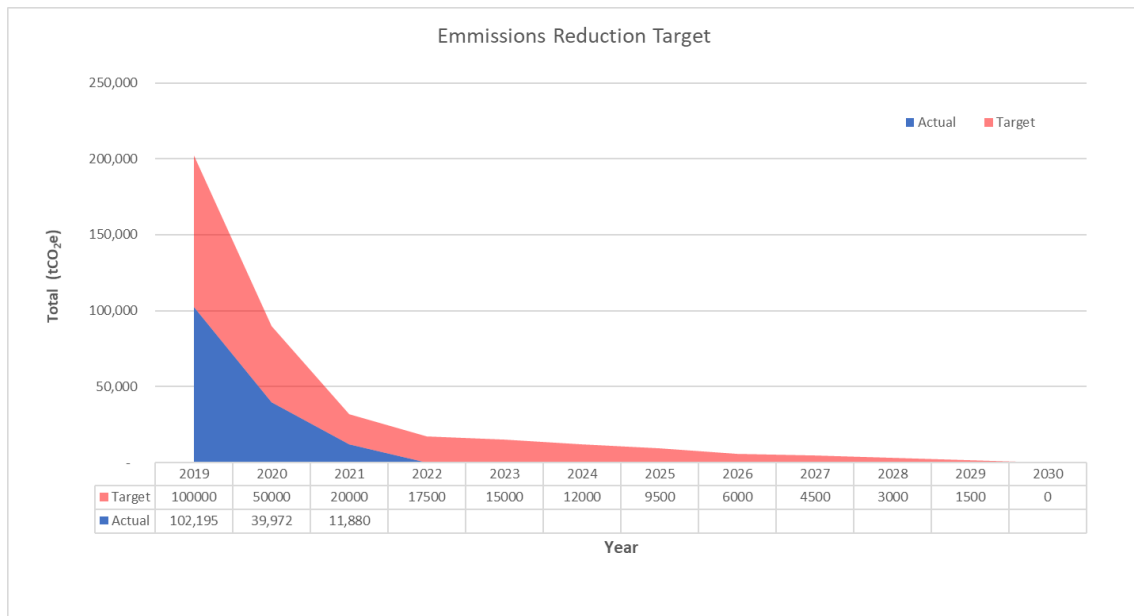

Reporting Year: 2021	
EMISSIONS	TOTAL (tCO ₂ e)
Scope 1	10,152
Scope 2	1,728
Scope 3 (Included Sources)	N/A
Total Emissions	11,880

Emissions reduction targets

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets.

We project that carbon emissions will decrease over the next five years to **5,940 tCO₂e** by **2026**. This is a reduction of **50%**

Progress against these targets can be seen in the graph below:

Carbon Reduction Projects

Completed Carbon Reduction Initiatives

The following environmental management measures and projects have been completed or implemented since the 2019 baseline. The carbon emission reduction achieved by these schemes equate to 90,315 tCO₂e, an 88%ge reduction against the 2019 baseline and the measures will be in effect when performing the contract.

Main carbon reduction projects include:

- Office relocation – Moving to an office more suited to our current operations
- Working from Home – Changing to a WFH first operation
- Commuting – Changing to a monthly face to face team meeting from 2 days a week
- IT Services – Reducing our IT resources to optimise for our operations.
- Travel – Change to a Video first client engagement strategy.

In the future we hope to implement further measures to offset Direct and Indirect emissions such as:

- Source Renewable Energy for IT services
- Source Renewable Energy for WFH programme
- Source NetZero Travel options
- Offset remaining emissions

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard¹ and uses the appropriate Government emission conversion factors for greenhouse gas company reporting².

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard³.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).
